

## ELITECH LINE

### Premium Range Hood Type Dishwasher - 500 x 500

#### EL60E

The Krupps ELITECH EL60E pass-through dishwasher is the top of the range thanks to its new construction technologies which guarantees highly efficient and effective results time and time again.

The **EL60E** is the right solution for businesses that are faced with the washing of different types of dishes, proving capable of washing glasses, dishes, medium sized objects up to 500x500x390(h) mm and GN1/1 container, ensuring a maximum productivity of **1080 dishes/hour** or **2160 glasses/hour**.

**Water consumption** is guaranteed to an amazing **2 litres per cycle**, regardless of the wash cycle time. The **Thermo-stop function** ensures that the washing and rinsing only starts when the desire temperature is reached.

The standard **double peristaltic electric rinse-aid and detergent dispenser** ensures the best result from each wash cycle with great savings thanks to the precise dosage.

The dishwashers of the **ELITECH** line ensure maximum performance thanks to the standard **Acquatech System** which, through an **atmospheric boiler and rinse pump**, maintains constant temperature and pressure and optimum water consumption. ELITECH ensures a **sanitising rinse cycle** and proves to be the perfect choice for every kitchen where compliance with HACCP rules is essential.

The **innovative UNIKO tempered glass touch screen** display makes any operation simple and intuitive, from the choice of the most suitable wash cycle to its progress control, as well as constantly monitoring the status of the dishwasher with ease. The choice of **4 wash cycles** makes the dishwasher customisable according to your needs. The integrated **self-diagnosis** minimises machine downtime advising you of any problems encountered.

The **"PUSH TO START"** cycle start system ensures less waste; preventing the start of empty washes.

The **self-cleaning cycle** at the end of the day cleans the wash tank and empties the boiler from the hot water, preventing limestone forming inside. Six rinse cycles will then start to sanitize the washing chamber. When completed, the water from rinsing is drained completely to avoid bacteria proliferation.

Stainless steel **moulded washing and rinsing arms** ensure great reliability and durability. The bodywork is made entirely of **AISI 304 stainless steel** and has been designed with all components in the front for **easy technical assistance**. Sturdy and reliable dishwashers to best deal with every moment of your day.

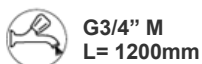

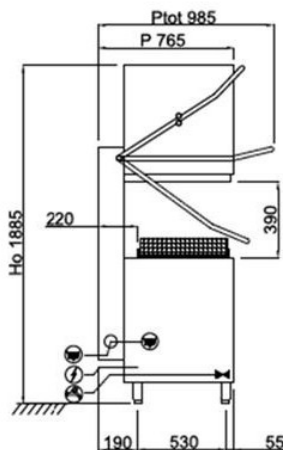

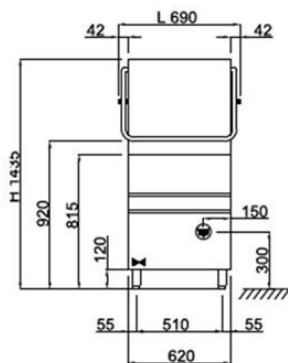

*Optional:* **Wi-Fi IKLOUD control** system that offers the possibility of remotely changing the dishwasher parameters and being monitored by your favourite service provider.

**Complete with built in drain, rinse, detergent and rinse aid pumps and backflow prevention by break-tank.**

**Comes with one glass rack 500x500x100mm, two 18-plate dish racks 500x500x100mm, one 8-division cutlery container and two integral tank filters.**
